JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY, VOLUME 218 (1987)

SUBJECT INDEX

Acetonitrile,
electrochemical polymeriztion of paradialkoxybenzenes. Part I. Anodic oxidation of paradimethoxybenzene in dry ——— (Le Berre et al.) 173

Alkyllead compounds,
reversible oxidation processes in dichloromethane for triethyl-, diethyl-, trimethyl-, and dimethyllead compounds at mercury electrodes (Bond, McLachlan) 197

Amalgam concentration,
——— at the surface of a sperical mercury electrode following a potential step (Anderson et al.) 41

Amalgam formation,
effect of sphericity on the voltammetric (polarographic) log plot for reversible ——— (Anderson et al.) 1

2-Aminoacrylic acid,
electrochemistry of ——— derivatives in acidic media as studied by background corrected pulse polarographic techniques and controlled potential electrolysis (Bond et al.) 213

Antimony,
effect of ——— on the electrochemical properties of $Pb/PbSO_4/H_2SO_4$ and $Pb/PbO/PbSO_4/H_2SO$ electrodes (Pavlov, Monakhov) 135

Background corrected pulse polarographic techniques,
Electrochemistry of 2-aminoacrylic acid derivatives in acidic media as studied by ——— and controlled potential electrolysis (Bond et al.) 213

Bimolecular diffusion controlled decay,
nanosecond time resolved cyclic voltammetry. Direct observation of electrogenerated intermediates with ——— using scan rates in the megavolt per second range (Amatore et al.) 361

Bismuth,
comparison of experiments with calculations using double-layer models. Specific adsorption of Cs^+ on ——— (Damaskin et al.) 65

Bromo-phenyl methyl sulphones,
electrochemically stimulated $S_{RN}1$ reactions on aromatic rings substituted by two leaving groups. The case of 4- and 2-——— (Simonet, Djeghidjech) 367

Caesium ion,
comparison of experiments with calculations using double-layer models. Specific adsorption of ——— on bismuth (Damaskin et al.) 65

Carbene anion radical,
electrochemical reduction of diazodimedone. Kinetics and thermodynamics of the formation of the ——— (Van Galen, Hawley) 227

Carbon monoxide,
infrared spectroscopic study of methanol and formic acid adsorbates on a platinum electrode. Part II. Role of linear CO(a) derived from methanol and formic acid in the electrocatalytic oxidation of CH_3OH and HCOOH (Kunimatsu, Kita) 155

Conducting salt electrode,
amperometric enzyme electrodes. Part III. A ——— for the oxidation of four different flavoenzymes (Albery et al.) 119

Controlled potential electrolysis,
electrochemistry of 2-aminoacrylic acid derivatives in acidic media as studied by background corrected pulse polarographic techniques and ——— (Bond et al.) 213

Copper,
the influence of ——— adatoms on a Pt electrode on the oxidation of formic acid (Fonseca et al.) 327

Cyclic voltammetry,
nanosecond time resolved ———. Direct observation of electrogenerated intermediates with bimolecular diffusion controlled decay using scan rates in the megavolt per second range (Amatore et al.) 361
Cytochrome *c*,
relationship of two electroactive forms of horse heart ——— at gold and glassy carbon electrodes in water and methanol (Rodrigues et al.) 251

Diazodimedone,
electrochemical reduction of ———. Kinetics and thermodynamics of the formation of the carbene anion radical (Van Galen, Hawley) 227
Dichloromethane,
reversible oxidation processes in ——— for triethyl-, diethyl-, trimethyl-, and dimethyllead compounds at mercury electrodes (Bond, McLachlan) 197
Differential pulse polarography,
irreversibility and reactant adsorption in ——— (Lovrić) 77
Double-layer models,
comparison of experiments with calculations using ———. Specific adsorption of Cs^+ on bismuth (Damaskin et al.) 65

Electrolyte electroadsorption,
———: a spectroscopic technique for thin film semiconducting electrodes (Pujadas et al.) 347
Enzyme electrodes,
amperometric ———. Part III. A conducting salt electrode for the oxidation of four different flavoenzymes (Albery et al.) 119
Amperometric ———. Part IV. An enzyme electrode for ethanol (Albery et al.) 127
Ethanol,
amperometric enzyme electrodes. Part IV. An enzyme electrode for ——— (Albery et al.) 127

Ferrocyanide,
polymer-modified electrodes. Part V. The use of hydrodynamically modulated rotating disk electrodes in the study of the mediated oxidation of ——— at ruthenium-containing polymer-modified electrodes (Cassidy, Vos) 341
Flavoenzymes,
amperometric enzyme electrodes. Part III. A conducting salt electrode for the oxidation of four different ——— (Albery et al.) 119
Formic acid,
infrared spectroscopic study of methanol and ——— adsorbates on a platinum electrode. Part II. Role of linear CO(a) derived from methanol and formic acid in the electrocatalytic oxidation of CH_3OH and HCOOH (Kunimatsu, Kita) 155
The influence of Cu adatoms on a Pt electrode on the oxidation of ——— (Fonseca et al.) 327

Hilbert transformation,
electrochemical generation and recapture currents are linked by ——— (Colyer et al.) 15
Horse heart cytochrome *c*,
relationship of two electroactive forms of ——— at gold and glassy carbon electrodes in water and methanol (Rodrigues et al.) 251

Inlaid ultra-microelectrodes,
application of transient electrochemical techniques to ———. Assessment of fabrication quality (Thormann, Bond) 187
Iridium,
kinetics of oxygen reduction at ——— electrodes in aqueous solutions (Sepa et al.) 265

Lead,
effect of Sb on the electrochemical properties of $Pb/PbSO_4/H_2SO_4$ and $Pb/PbO/PbSO_4/H_2SO_4$ electrodes (Pavlov, Monakhov) 135

Magnesium,
electrochemical formation of a ——— vanadium bronze $Mg_xV_2O_5$ in sulphone-based electrolytes at 150°C (Pereira-Ramos et al.) 241
Methanol,
infrared spectroscopic study of ——— and formic acid adsorbates on a platinum electrode. Part II. Role of linear CO(a) derived from methanol and formic acid in the electrocatalytic oxidation of CH_3OH and HCOOH (Kunimatsu, Kita) 155

Multilayer adsorption,
effect of overlying layers on the kinetics of ——— involving electron transfer (Pritzker, Phule) 331

Overlying layers,
effect of ——— on the kinetics of multilayer adsorption involving electron transfer (Pritzker, Phule) 331
Oxygen reduction,
kinetics of ——— at iridium electrodes in aqueous solutions (Sepa et al.) 265
Rotating disk electrode: a re-examination of some kinetic criteria with a special reference to ——— (Vesovic et al.) 53

Paradialkoxybenzenes,
electrochemical polymerization of ———. Part I. Anodic oxidation of paradimethoxybenzene in dry acetonitrile (Le Berre et al.) 173
Polymerization,
electrochemical ——— of paradialkoxybenzenes. Part I. Anodic oxidation of paradimethoxybenzene in dry acetonitrile (Le Berre et al.) 173
Polymer-modified electrodes,
———. Part V. The use of hydrodynamically modulated rotating disk electrodes in the study of the mediated oxidation of $[Fe(CN)_6]^{4-}$ at ruthenium-containing polymer-modified electrodes (Cassidy, Vos) 341
Poly(3-methylthiophene),
electrolyte effect on the electrochemical properties of ——— thin films (Marque et al.) 107
Potential of zero charge,
the temperature coefficient of the ——— of the (110) face of silver (Bacchetta et al.) 355

Radiotracer study,
a coupled voltammetric and radiometric (voltradiometric) study of the simultaneous adsorption of hydrogen and anions at platinized platinum electrodes (Horányi, Rizmayer) 337
Combined electrochemical and radiotracer (cyclic voltradiometric) study of the motion of counter-ions in tetracyanoquinodimethane modified electrodes (Inzelt et al.) 297
Recapture currents,
electrochemical generation and ——— are linked by Hilbert transformation (Colyer et al.) 15

Rotating disk electrode,
———: a re-examination of some kinetic criteria with a special reference to oxygen reduction (Vesovic et al.) 53
Ruthenium,
polymer-modified electrodes. Part V. The use of hydrodynamically modulated rotating disk electrodes in the study of the mediated oxidation of $[Fe(CN)_6]^{4-}$ at ———-containing polymer-modified electrodes (Cassidy, Vos) 341

Silver,
study of the atomic stability of Ag (111) and Ag (100) electrodes in contact with NaF solutions (Lecoeur et al.) 319
The temperature coefficient of the potential of zero charge of the (110) face of ——— (Bacchetta et al.) 355
Sodium fluoride,
study of the atomic stability of Ag (111) and Ag (100) electrodes in contact with ——— solutions (Lecoeur et al.) 319
Spherical electrode,
amalgam concentration at the surface of a mercury ——— following a potential step (Anderson et al.) 41
Concentration of a solution-soluble electroactive species at the surface of a ——— following a potential step (Myland et al.) 29
Sphericity,
effect of ——— on the voltammetric (polarographic) log plot for reversible amalgam formation (Anderson et al.) 1
Sulphone,
electrochemical formation of a magnesium vanadium bronze $Mg_xV_2O_5$ in ———-based electrolytes at 150 °C (Pereira-Ramos et al.) 241
Electrochemically stimulated $S_{RN}1$ reactions on aromatic rings substituted by two leaving groups. The case of 4-bromo- and 2-bromophenyl methyl sulphones (Simonet, Djeghidjech) 367
Surfactants,
improved method of the determination of traces of ——— by means of suppression of the polarographic maximum of the first kind (Bednarkiewicz, Kublik) 93

Tetracyanoquinodimethane,
combined electrochemical and radiotracer (cyclic voltradiometric) study of the motion of counter-ions in ——— modified electrodes (Inzelt et al.) 297

Thin film semiconducting electrodes,
electrolyte electroadsorption: a spectroscopic technique for ——— (Pujadas et al.) 347
Thymine,
condensed ——— films at the mercury/water interface. Part IV. Stochastic measurements (Sridharan, De Levie) 287
Condensed ——— films at the mercury/water interface. Part III. Thermodynamic analysis (Saffarian et al.) 273
Trace determination,
improved method of the ——— of surfactants by means of suppression of the polarographic maximum of the first kind (Bednarkiewicz, Kublik) 93

Ultra-microelectrodes,
application of transient electrochemical techniques to inlaid ———. Assessment of fabrication quality (Thormann, Bond) 187

Vanadium,
electrochemical formation of a magnesium ——— bronze $Mg_xV_2O_5$ in sulphone-based electrolytes at 150°C (Pereira-Ramos et al.) 241
Viologen,
"in situ" investigation by simultaneous voltammetry and UV–visible reflectance spectroscopy of some ——— radicals adsorbed on a platinum electrode (Crouigneau et al.) 307
Voltradiometry,
a coupled voltammetric and radiometric (voltradiometric) study of the simultaneous adsorption of hydrogen and anions at platinized platinum electrodes (Horányi, Rizmayer) 337
Combined electrochemical and radiotracer (cyclic voltradiometric) study of the motion of counter-ions in tetracyanoquinodimethane modified electrodes (Inzelt et al.) 297
